Profile

Strategic Data Analyst with over **3 years** of experience in retail and e-commerce, specializing in **sales performance, stock optimization, and campaign reporting**. Skilled in **Power BI, SQL, Excel, Python**, and Google Sheets. Proven ability to deliver actionable insights, automate reporting, and collaborate with stakeholders to drive revenue growth. Holds a **Master of Science in Big Data Analytics**.

Professional Experience

Data Analyst

Feb 2024 – Apr 2025

CodeRythm Technology Pvt Ltd, Business Center, Kozhikode, Kerala

- Developed advanced **Power BI dashboards** for e-commerce clients to track sales, stock, and campaign performance; utilized **SQL** and **Python** for in-depth data modeling, improving product selection and marketing efficiency.
- Streamlined retail operations by **optimizing product listing processes** and managing real-time **allocation of stock** across multiple warehouses, ensuring balanced inventory distribution and reduced fulfillment delays.
- Managed HR datasets to support hiring and workforce planning, driving **reporting automation** that reduced turnaround time by 20% and enabled faster, data-driven decision-making.

Data Analyst

Mar 2021 – Nov 2022

Homeland Traders, Malappuram, Kerala

- **Forecasted sales trends** to guide purchasing decisions, optimized inventory levels, and ensured timely procurement of high-demand products, minimizing stockouts and overstock situations.
- Designed and maintained **Excel dashboards** to monitor daily sales performance, tracked workforce incentives, and delivered actionable insights that improved retail team productivity and goal achievement.
- Spearheaded allocation strategies to distribute products efficiently across multiple warehouses, enhancing stock visibility and meeting regional demand fluctuations.
- Collaborated across sales, operations, and marketing teams to plan and execute targeted campaigns, resulting in increased customer engagement, **improved sales conversion**, and overall retail efficiency.

Education

Master of Science in Big Data Analytics

2022 – 2024

Central University of Rajasthan, Rajasthan, India

CGPA: 8.2

Relevant Courses: Programming for Data Science, Statistical Theory, Graphs, Optimization Modelling, Machine Learning, Algebra, Probability Distributions, Data Mining, Econometrics.

Skills

Technical Skills:

Power BI, SQL, Excel, Google Sheets, Python (Pandas, NumPy, Scikit-learn), Machine Learning, Predictive Modeling, Data Visualization, Dashboard Development, Forecasting, A/B Testing, Data Cleaning, Data Transformation, Automated Reporting, MIS Reporting, Business Intelligence, KPI Tracking

Other Skills:

Data Analysis, Business Analysis, Retail Analytics, E-commerce Analytics, Sales Optimization, Stock Optimization, Campaign Reporting, Performance Reporting, Stakeholder Communication, Requirement Gathering, Process Improvement, Cross-functional Collaboration

Projects

E-commerce Product and Order Insights Dashboard

Developed a comprehensive Power BI dashboard for Amazon sellers to analyze sales, product performance, and order trends. Enabled data-driven decision making to optimize sales strategies and inventory management. Provided interactive visualizations to track sales by product, region, and time period. Improved fulfillment process insights for better operational efficiency.

Employee Attrition HR Analysis Dashboard

Created an interactive Power BI dashboard to analyze employee attrition and turnover patterns. Visualized key HR metrics including demographics, job roles, compensation, performance, and satisfaction. Identified factors contributing to attrition and high-risk employee segments. Supported strategic workforce planning and retention initiatives.

KPI Dashboard – Empowering Smarter Tracking

Built a retail sales performance tracking dashboard using Excel and Google Sheets. Monitored total sales, profit margins, and daily/weekly trends with clear visualizations. Provided progress tracking against yearly sales targets for fast decision-making. Enabled identification of performance gaps and growth opportunities.

Retail Performance Dashboard – Advanced Power BI Solution

Developed a dynamic Power BI dashboard integrating Google connectors for real-time retail data. Delivered insights on sales, profit margins, and campaign effectiveness by product, region, and sales channel. Included advanced filtering and drill-down capabilities for detailed analysis. Automated data updates to empower timely, data-driven decisions.

Online Courses & Certifications

- **Google Data Analytics Professional Certificate** – Coursera
Skills: MS Excel, Spreadsheets, SQL, BigQuery, R Studio, Data Storytelling
- **Machine Learning Internship Certificate** – YBI Foundation
Skills: Data Cleaning, Regression Analysis, Classification Algorithms, Data Preprocessing
