PROFESSIONAL SUMMARY

Retail and e-commerce analyst with 3+ years of experience, specializing in inventory, pricing and branch-performance analytics across multi-branch and omnichannel operations. Pairs commercial knowledge of purchasing and sales targets with hands-on SQL, Power BI, advanced Excel and Python skills, so operations and buying teams work from accurate performance data. MSc in Big Data Analytics.

TECHNICAL & CORE COMPETENCIES

Retail & Inventory Analytics: Sales reporting, inventory analysis, stock aging, SKU rationalization, purchase audits, price-range analysis, campaign and incentive analysis, target budgeting, omnichannel and e-commerce analytics

SQL, ETL & Data Management: Advanced SQL, ETL pipelines, data modeling, database schemas, data cleaning and transformation, data validation, data governance

Business Intelligence & Reporting: Power BI, Tableau, data visualization, dashboard development, KPI and performance reporting, data storytelling

Advanced Excel & Automation: Excel functions, Power Query, Google Sheets, workflow automation

Python & Statistical Analysis: Python (Pandas, NumPy, Scikit-learn), exploratory data analysis (EDA), predictive modeling, forecasting, statistical analysis, A/B testing, Google Analytics

PROFESSIONAL EXPERIENCE

MIS & Data Analyst

Al Madina Group, Abu Dhabi, UAE | Jun 2025 - Present

- Monitor sales growth, inventory health, SKU movement and campaign effectiveness across 19 branches, supporting operational and strategic decisions.
- Improve inventory efficiency and margin control through SKU monitoring and rationalization, price-range analysis, purchase and inventory audits, and purchase stock setup.
- Lead branch-level target budgeting and target setting, enabling accurate performance measurement and sales planning.
- Produce ad-hoc analyses of stock aging, pricing, campaign performance, footfall trends, incentives and sales effectiveness.

Data Analyst

Al Anees Electronics Co. W.L.L, Doha, Qatar | Aug 2024 - Apr 2025

- Partnered with the purchase team to reduce over-purchase and under-purchase risk, enabling data-driven buying decisions and optimized stock levels.
- Analyzed omnichannel sales performance, e-commerce competitor activity and call center fulfillment data to guide campaign planning and product selection.
- Controlled stock aging and ran periodic inventory reviews to maintain inventory health and sustainable sales growth across omnichannel operations.
- Managed end-to-end reporting and dashboard development in Power BI, Excel and SQL, turning findings into clear recommendations for business units.

Data Analyst

CodeRythm Technology Pvt Ltd, Kozhikode, Kerala, India | Feb 2024 - Jul 2024

- Designed and maintained scalable ETL pipelines, data models and database schemas, supporting reliable analytics, automated reporting and efficient data retrieval.
- Collected, cleaned and transformed large datasets from databases, APIs and web scraping using Python, advanced SQL, Power Query and Excel, ensuring data accuracy and integrity.
- Applied statistical analysis, EDA, predictive modeling and forecasting to identify trends, anomalies and optimization opportunities.
- Developed interactive Power BI dashboards and automated KPI reports for cross-functional stakeholders.

Data Analyst
Homeland Traders, Malappuram, Kerala, India | Mar 2021 - Nov 2022

- Automated data cleansing, routine analysis and reporting workflows, strengthening data governance and compliance while improving accuracy and operational efficiency.
- Conducted ad-hoc trend and pattern analyses and contributed to predictive models for market-trend forecasting, helping the business respond quickly to changing needs.
- Built dashboards and visual reports that presented findings to technical and non-technical audiences.

EDUCATION

Master of Science (MSc), Big Data Analytics
Central University of Rajasthan, India | 2022 - 2024
Coursework: Programming for Data Science, Statistical Theory, Machine Learning, Data Mining, Econometrics, Predictive Modeling, Optimization Modeling, Probability Distributions

Bachelor of Science (BSc), Computer Science
University of Calicut, Kerala, India | 2018 - 2021
Coursework: Data Structures, Software Engineering, Databases, Statistics, Python, Java

CERTIFICATIONS

- **Google Data Analytics Professional Certificate** | Coursera
  Key skills: BigQuery, R (RStudio), spreadsheets, data visualization

INTERNSHIP & TRAINING

- **Machine Learning Internship** | YBI Foundation (internship certificate)
  Key skills: regression analysis, classification algorithms, data preprocessing

LANGUAGES

English, Hindi, Malayalam, Tamil
