Profile

Strategic Data Analyst with over **3 years** of experience in retail and e-commerce, specializing in **sales performance, stock optimization, campaign reporting, data governance, and customer segmentation**. Skilled in **Power BI, SQL, Excel, Python**, and Google Sheets. Proven ability to deliver actionable insights through **predictive analytics, machine learning, data visualization**, and automate reporting workflows. Experienced in **ETL processes, KPI tracking, and stakeholder communication** to drive revenue growth. Holds a **Master of Science in Big Data Analytics**.

Skills

Power BI, Tableau, SQL, Excel, Google Sheets, Python (Pandas, NumPy, Scikit-learn), Data Analysis, Business Analysis, Data Visualization, Dashboard Development, Retail Analytics, E-commerce Analytics, Sales Optimization, Stock Optimization, Campaign Reporting, Performance Reporting, Forecasting, Trend Analysis, Machine Learning, Predictive Modeling, A/B Testing, Data Cleaning, Data Transformation, Automated Reporting, MIS Reporting, Business Intelligence, KPI Tracking, Stakeholder Communication, Requirement Gathering, Process Improvement, Cross-functional Collaboration, Data Governance, ETL Pipeline Development, Root Cause Analysis, Agile Methodology

Professional Experience

Data Analyst

Feb 2024 – Apr 2025

CodeRythm Technology Pvt Ltd, Business Center, Kozhikode, Kerala

- Designed and delivered interactive **Power BI dashboards**, including a dedicated E-commerce Product and Order Insights solution, enabling sellers to track product performance, order trends, and fulfillment efficiency for data-driven inventory, marketing strategies, and **customer segmentation**.
- Leveraged **SQL** and **Python** for advanced data modeling, integration, and **ETL pipeline** automation, improving product selection accuracy and enhancing the effectiveness of marketing campaigns across digital retail platforms.
- Optimized retail operations by refining product listing processes and implementing real-time **stock allocation** models across multiple warehouses, ensuring efficient inventory distribution and reducing delivery delays through data-driven decision making.
- Created an **Employee Attrition HR Analysis Dashboard** to assess key HR indicators such as job satisfaction, performance, compensation, and tenure, identifying high-risk segments and supporting targeted

retention planning using predictive analytics.

- Automated routine HR reporting processes, cutting manual turnaround times by 20% and enabling leadership to make faster, evidence-based workforce decisions leveraging **data governance** and quality assurance.
- Managed and analyzed **CSR (Customer Service Representative) performance data**, identifying key trends in resolution time, customer satisfaction, and case volume to evaluate individual and team effectiveness, and support service quality improvements.
- Evaluated day-to-day employee operations to track performance, uncover inefficiencies, and support continuous process improvement initiatives.

Data Analyst

Mar 2021 – Nov 2022

Homeland Traders, Malappuram, Kerala

- Conducted sales trend forecasting and **predictive modeling** to inform purchasing strategies, optimize stock levels, and ensure timely procurement of high-demand items, reducing stockouts and overstocking.
- Developed and maintained Excel-based performance tools, including a **KPI Dashboard** built with Google Sheets and Excel, providing real-time tracking of sales, profit margins, and target achievements to support rapid decision-making.
- Built a **Retail Performance Dashboard** using Power BI and Google connectors to integrate real-time data, offering detailed insights into sales performance by product, region, and sales channel with advanced filtering, drill-down features, and **data visualization best practices**.
- Led warehouse allocation strategies to improve stock distribution, ensuring product availability aligned with regional demand patterns and enhancing operational efficiency through **root cause analysis** and continuous improvement.
- Collaborated with cross-functional teams to design and execute data-informed marketing and sales campaigns, resulting in improved customer engagement, higher conversion rates, and streamlined retail performance.
- Planned and optimized **sales-driven marketing campaigns**, introducing incentive schemes for field sales employees; tracked individual purchase contributions to reward top performers and boost motivation across sales channels.

Education

Master of Science in Big Data Analytics

2022 – 2024

Central University of Rajasthan, Rajasthan, India

CGPA: 8.2

Relevant Courses: Programming for Data Science, Statistical Theory, Graphs, Optimization Modelling, Machine Learning, Algebra, Probability Distributions, Data Mining, Econometrics.

Bachelor of Science in Computer Science

2018 – 2021

University of Calicut, Kerala, India

Relevant Courses: Coding with C, Data Structures, Software Engineering, Algebra, Statistics, Android, Java, Databases, Python.

Online Courses & Certifications

- **Google Data Analytics Professional Certificate** – Coursera
Skills: MS Excel, Spreadsheets, SQL, BigQuery, R Studio, Data Storytelling, Data Cleaning, Data Visualization
- **Machine Learning Internship Certificate** – YBI Foundation
Skills: Data Cleaning, Regression Analysis, Classification Algorithms, Data Preprocessing, Predictive Modeling
